

Margarita

Hi! I'm Margarita Cifuentes and I'm currently completing my Master of Information at the University of Toronto. This summer, I worked as a Summer Camp Facilitator and Digital Media Specialist for Tucc. I wanted to work for Spaces United because, through my work experiences and education, I have become passionate about excellent information provision and understanding the information needs of varying people. This summer I worked on redesigning the website for Cummer Avenue UC, to build a strong web presence for them. Spaces United has allowed me to understand local communities and how to provide spaces and services that are accessible and valuable. An interesting event I got to work on this summer was the Lansing Open Market on September 16th, 2023, which I helped create. I learned a lot about event design, planning, and management, and since it was an inaugural market, this work was also very fun! I'm happy to have had these experiences, which I will be able to take with me into my future career, hopefully as a librarian!

Lansing Open Market – Click the link for more info:
