

Monica

This is my second summer working as a Summer Student at TUCC and I'm excited to be part of the team again, this time as Property Researcher. Through this position, I want to apply my knowledge from the Master of Information program at UofT to the organization of property assets and research. I chose to work at TUCC because they provide excellent mentorship to their students and focus on improving our professional skills that will help us to exceed in a workplace environment. My focus for this summer is to be an expert of TUCC's church properties with cemeteries. I get to visit small churches with cemeteries across Ontario, understanding how each property is managed and meeting the people who use them.
